

# OMNISHORE

### Vehicle shoring

### Trench shoring

### High directionals

### Structural shoring

**OmniShore**  
Safety secured.

**Every rescue shoring operation calls for unique skills. Time for equally unique equipment.**

First responders must be able to adapt to every possible situation. Have the ability to change tactics every step of the way. And be smart enough to always think ten steps ahead.

Holmatro understands the challenges of rescue shoring. That's why we've created a shoring system that is as adaptive, versatile and intuitive as you. **This is OmniShore.** A shoring system reimagined from the ground up, designed in accordance with the highest standards of quality and safety.

OmniShore features cutting-edge, patented innovations, giving you an edge in quickly and safely responding to every shoring scenario imaginable.

Holmatro developed OmniShore according to the criteria of testing used by FEMA's US&R Structures Sub Group to evaluate similar type shoring.

Easily construct lengths up to 5.2 meters without any need for extension pipes.

## Overcome unlimited shoring challenges with a minimum number of components.

### One single system for all shoring operations

OmniShore is the world's first and only shoring solution that allows you to build any application with a system of only six different struts.

### Save weight and space on your truck

Compact yet complete, the OmniShore system takes up less space on your truck and in storage. It has been designed to do more with less.

### Construct any length from 28 cm to 5.2 m with five different struts

With the OmniShore M10, P20, P30, P40 and P60 struts you have access to the longest extension range on the market.

### Fixed length extension pipes are not needed

We've eliminated the need for impractical extension pipes. Each strut also functions as one, saving you time as well as space.

**PATENTED**

Struts and accessories always fit together thanks to the patented Trident Coupler.

## Experience a quick and easy setup in one intuitive workflow.

- Connect every single strut to every other single strut**  
Our patented Trident Coupler always fits with ease. You can only connect two struts together, so any connection you can make is 100% safe.
- Connect accessories quickly and easily**  
We've made sure that every single accessory fits the Trident Coupler and the plunger end of each strut.

## Two connected struts = twice the plunger stroke.

- Exact measurement is not needed**  
Two connected struts offer twice the plunger stroke, eliminating the need for precise measurement and allowing fast setup during demanding, time sensitive situations.

Take full control  
with less manpower  
thanks to OmniLock.

**PATENTED**

**No one needs to be near a moving load**

With our patented OmniLock system you can monitor and operate struts from a safe distance. You will spend less time in the danger zone to focus on what matters: making sure safety is secured.

**Automatically follow and lock a load**

Auto-follow has your back. Every OmniLock strut automatically follows a load in upward and downward motion, remaining mechanically locked at all times.

OmniLock and all  
Pentheon rescue tools  
share the same  
interchangeable battery.

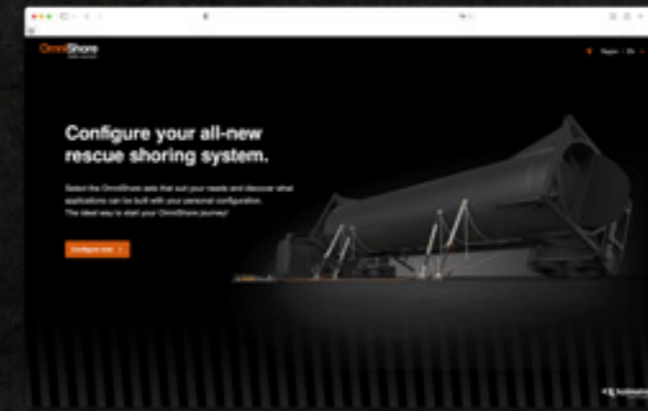

**Less people needed  
to control a situation.**

OmniLock seamlessly works with our state-of-the-art Wireless Controller. This remotely operated device lets you control multiple OmniLock struts simultaneously and align them effortlessly.

Configure your OmniShore set now!

## Configure your all-new rescue shoring system.

The OmniShore Configurator is a user-friendly online tool guiding you through the process of selecting the sets that suit your needs.

Discover what applications can be built with your personal configuration and start your OmniShore journey!

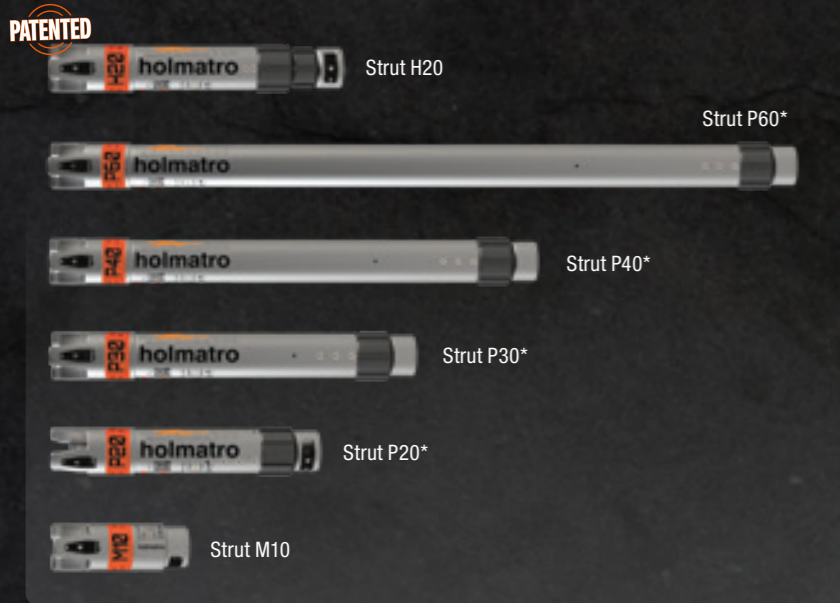

Scan this code to configure now!

# The most compact yet complete system ever.

OmniShore has been designed to do more with less. Featuring a limited number of components to support you in making every shoring operation safe and successful.

## Struts

\*Also available in OmniLock

## Pneumatic Drive

\*\*Multiple variants available

## Bases

## Rails

## Hydraulic Drive

## OmniLock Drive

## Heads

## Clamps

## Assist Tools

**OmniShore**  
Safety secured.

## TRENCH SHORING SETS

### Basic Trench Shoring – Pneumatic Set

- For small & medium trenches and basic spot shores
- With expansion sets also suitable for T-trench, vehicle stabilization, lifting and high directionals

### Advanced Trench Shoring – Pneumatic Set

- For large trenches and basic spot shores
- With expansion sets also suitable for T-trench, L-trench, vehicle stabilization, lifting and high directionals

### Basic Trench Shoring – OmniLock Set

- For small & medium trenches and basic spot shores
- With expansion sets also suitable for T-trench, vehicle stabilization, lifting and high directionals
- Automatically follow and lock a load in both directions with OmniLock

### Advanced Trench Shoring – OmniLock Set

- For large trenches and basic spot shores
- With expansion sets also suitable for T-trench, L-trench, vehicle stabilization, lifting and high directionals
- Automatically follow and lock a load in both directions with OmniLock

- Automatically follow and lock a load in both directions with OmniLock

# OMNISHORE DRIVE ELEMENTS

## Multifunctional equipment

The OmniShore system has been designed to do more with less:  
 - Use your battery and charger for the Power Station also for all Holmatro Pentheon tools

- Use your Control Unit, Pressure Reducer and Air Hoses for pneumatic struts also for all Holmatro Lifting & Stack Bags  
 - Use your Hand Pump for hydraulic struts also for all other single-acting Holmatro tools

## Hydraulic lifting

All OmniShore and OmniLock sets can be combined with a Hydraulic Lifting Hand Pump Set for structural and vehicle lifting.

## High directionals

All OmniShore and OmniLock sets can be combined with a Monopod, Bipod or Tripod Set to build high directionals for rope rescue applications.

# OMNISHORE STRUTS

H20, P60, P40, P30, P20 and M10

All sets are also available with OmniLock struts.

pneumatic struts - 6 kN / 0,6 t									
model	art. no.	locking system	stroke mm	retracted length mm	extended length mm	weight kg	dimensions mm		
P20	151.001.606	locknut	215	560	775	6.7	560 x 100 x 100

mechanical strut									
model	art. no.	locking system	total spreading stroke mm	stroke 1st plunger mm	stroke 2nd plunger mm	retracted length mm	extended length mm	weight kg	dimensions mm
M10	151.001.601	thread	179	85	94	286	466	3.6	286 x 97 x 97

## User friendly design

- Easy to carry – Lightweight
- No risk of the plunger falling out – Every strut has a stop block
- Smooth winding of the nut at all times – A groove on every plunger acts as a drain for dirt
- Easy tightening of the locknut – Each strut has slots for the Shoring Hammer

## Automatic snap-lock mechanism

- Connect and disconnect all accessories within a second
- No protruding parts – Flush to strut body

## Clear information labels

- Overview of all possible strut combinations, corresponding lengths and work load limits
- QR code linking to up-to-date manuals and tabulated data
