<b>rating</b>		
A	Recommended	Little or minor effect, long service may be expected with Suitable for continuous service.
B	Minor to moderate	still useful in many applications but properties will be affected by the exposure. Usually suitable for continuous and intermittent service.
C	Moderate to severe	perhaps still useful in limited applications if exposure is limited or infrequent. Not recommended for continuous use but may give some service if it is the only option available.
U	Not recommended	
blank	no data or insufficient evidence	The table positions which are not rated indicate insufficient information at the time of publication to determine an accurate rating.
